Sportbettcal protein VELO7Ow - yeast (Saccharomyces cerevisiae)
NyAlternate names: hypothetical protein N3810; hypothetical protein VNR073c
C;Species; Saccharomyces cerevisiae
C; Species; Saccharomyces cerevisiae
C; Date: 2B -May-1993 #sequence_revision 24-Feb-1995 #text_change 23-Mar-2001
C; Accession: $50519; $563406; $53411; $54055; $53890
R; Dietrich, F.S.
submitted to the DMBL Data Library, December 1994
A; Description: The sequence of S. cerevisiae cosmids 9669, 8334, 8199, and lambda clone
A; Reference number: $50434
A; Residues: 1-502 Anna

A; Title: The complete genome sequence of Escherichia coli K-12.
A; Reference number: A64720; MUID:97426617; PMID:9278503
A; Reference number: A64720; MUID:97426617; PMID:9278503
A; Recession: E65246
A; Status: nucleic acid sequence not shown; translation not shown
A; Molecule type: DNA
A; Restences: GB:AE000503; GB:U00096; NID:g1790777; PIDN:AAC77279.1; PID:g1790779;
A; Experimental source: strain K-12, substrain MG1655
C; Genetics:
A; Gene: usub
C; Function:
A; Description: reversible reaction of D-mannonate and NAD(+) to D-fructuronate and NADH
A; Pathway: D-glucuronate catabolism
A; Note: part of the interconversion of D-fructuronate to D-2-keto-3-deoxy-D-gluconate
A; Note: reduces also D-tagaturonate
C; Superfamily: conserved hypothetical protein YEL070w
C; Keywords: carbon-oxygen lyase; hydro-lyase; NAD; oxidoreductase
                                                                                                                                                                                                                                                                                                      Nalternate names: D-mannonate oxidoreductase
C;Species: Bscharichia coli
C;Species: Bscharichia coli
C;Accession: 356548; E65246

A;Title: The complete genome sequence of Escherichia coli K-12.
A;Reference number: A64720; MUID:97426617; PMID:9278503
                                                                                                                                                                                                                                                                                                                                               A; Gene: yeio

C; Function:

A; Description: reversible reaction of D-mannonate and NAD(+) to D-fructuronate and NADH

A; Pathway: D-glucuronate catabolism

A; Note: part of the interconversion of D-fructuronate to D-2-keto-3-deoxy-D-gluconate

A; Note: reduces also D-tagaturonate

C; Superfamily: conserved hypothetical protein YEL070w

C; Reywords: carbon-oxygen lyase; hydro-lyase; NAD; oxidoreductase
                                                                                                                                                                                                                    A; Molecule type: DNA
